Cal State L.A. Hydrogen Research and Fueling Facility.

Cal State L.A. hydrogen station becomes first in California to be certified to sell fuel to public

The Cal State L.A. Hydrogen Research and Fueling Facility has become the first station in California to be certified to sell fuel to the public.

The facility recently passed a rigorous state performance evaluation and can now sell hydrogen by the kilogram to drivers of fuel cell vehicles.

"This is a milestone in the commercialization of hydrogen in preparation for the next generation of electric vehicles that will be powered by hydrogen," said Michael Dray, technical operations manager at the fueling facility. "It's equivalent to getting the first sticker from the state government to sell gasoline by the gallon."

Governor Jerry Brown's office recently informed the university that the fueling facility had received the certification, known as California Type Approval. The state is leading the effort to develop such facilities and has allocated \$200 million during the next decade to further the construction of a hydrogen-fueling network across California.

The Governor's Office of Business and Economic Development (GO-Biz) said the hydrogen station's certification "demonstrates that close coordination between government and industry can enable a seamless and fair consumer experience for this critical technology."

"GO-Biz commends the entire team at Cal State L.A. for their work to advance the commercial success of hydrogen fuel cell electric vehicles," said Tyson Eckerle, zero emission vehicle infrastructure project manager for GO-Biz.

Opened last May, the fueling station at Cal State L.A. is the largest such facility on a university campus in the United States and produces hydrogen on site. The station is capable of using renewable

sources such as solar and wind power for hydrogen production.

The hydrogen facility provides key research data on fueling performance and station operations to the U.S. Department of Energy and National Laboratories, as well as to state agencies such as the California Energy Commission and California Air Resources Board.

"Our hydrogen station is playing a crucial role in helping situate California as a national leader in zero emission vehicles," University President William A. Covino said. "The station also provides an ideal opportunity for Cal State L.A. students, faculty, and staff to collaborate on cutting-edge research and technology initiatives with government agencies that will contribute to improving air quality in Los Angeles and beyond."

The hydrogen station has sparked international interest. In the last six months, visitors from Korea, Japan, China, Russia, Germany, and Scotland have come to Cal State L.A. to tour the facility.

Audi, Honda, Hyundai, General Motors, Mercedes Benz, and Volkswagen have all fueled prototype hydrogen vehicles at the Cal State L.A. station. These vehicles, which emit only water vapor, hold approximately six kilograms of hydrogen and take about six minutes to fill. A kilogram typically allows a vehicle to travel about 50 miles.

This year marked a new chapter in the use of hydrogen vehicles when Hyundai produced several hundred vehicles, many of which are being leased to drivers in the Los Angeles area, Mr. Dray said. Ideally located near two freeways and downtown Los Angeles, the Cal State L.A. fueling facility will play an increasingly important role as the use of hydrogen vehicles becomes more widespread.

Emmaus School open house to feature campus tours

Emmaus Lutheran School and Pre-school will offer an open house from 10:30 a.m. to 1 p.m. Sunday, March 8, at 840 S. Almansor St., Alhambra.

Phone to tour the school's 6+ acre campus. Emmaus offers quality academic programs, before and after school care, sport

teams, tennis, piano, choirs and music for all students, student government, field trips, library, large field integrated technology, and full service gym.

For more information, visit www.emmauslutheranchurch.org, or phone 626-289-3664.

JAYVEEDANCE PRESENTS

SYNERGY

ALL STARS COMPETITION DANCE TEAM 2ND ANNUAL SHOWCASE

featuring All Stars, Maker Empire, & Culture Shock LA

Saturday, March 21, 2015
Doors open at 5:30pm | Show starts at 6:00pm

Gabriellino High School
1327 South San Gabriel Boulevard, San Gabriel, CA 91776

\$25 presale | \$30 at the door
Presale ends Friday March 20 at 8:00pm
Tickets available on AllStarsSYNERGY.eventbrite.com

Proceeds help dancers with their competitions, props, and more. We thank you for your support of our amazing dancers!
