Safety Tips:

- When traveling in areas near campus, be alert to your surroundings and people around you, especially if you are alone or walking during late hours.
- When walking, stick to well-populated, busy areas. Avoid hidden trails, short cuts through secluded areas or lanes that are not well traveled. Stay where there is traffic and other people on foot.
- Walk in areas that are well lighted. Do not walk in dark parking lots, dark alleys, dark lanes, dark trails, or any other dark areas. A lighted path in a well-populated area is your safest route to any destination, even if it takes longer.
- Do not shut yourself off from your surroundings. Headphones isolate you and make it very easy for an attacker to surprise you.
- Carry a cell phone to have handy to call 911 or use during other minor emergencies. Do not make and take calls while walking. This will distract you.
- Let others know about your whereabouts. Always leave notice of where you are going and when you are expected to return.
